SITOP modular/3AC/DC24V/20A/CO

SITOP modular plus 20 A Stabilized power supply input: 3 AC 400-500 V output: 24 V DC/20 A Option for with protective varnish

Figure similar

input				
type of the power supply network	3-phase AC			
supply voltage at AC				
minimum rated value	400 V			
maximum rated value	500 V			
• initial value	320 V			
• full-scale value	550 V			
supply voltage at AC	Starting from Vin > 340 V			
wide range input	Yes			
overvoltage overload capability	2.3 × Vin rated, 1.3 ms			
buffering time for rated value of the output current in the event of power failure minimum	6 ms			
operating condition of the mains buffering	at Vin = 400 V			
line frequency	50/60 Hz			
line frequency	47 63 Hz			
input current				
 at rated input voltage 400 V 	1.1 A			
at rated input voltage 500 V	0.9 A			
current limitation of inrush current at 25 °C maximum	35 A			
I2t value maximum	0.7 A²·s			
fuse protection type	none			
fuse protection type in the feeder	Required: 3-pole connected miniature circuit breaker 6 16 A characteristic C or circuit breaker 3RV2011-1DA10 (setting 3 A) or 3RV2711-1DD10 (UL 489)			
output				
voltage curve at output	Controlled, isolated DC voltage			
output voltage at DC rated value	24 V			
output voltage				
at output 1 at DC rated value	24 V			
output voltage adjustable	Yes; via potentiometer			
adjustable output voltage	24 28.8 V; max. 480 W			
relative overall tolerance of the voltage	3 %			
relative control precision of the output voltage				
on slow fluctuation of input voltage	0.1 %			
on slow fluctuation of ohm loading	0.2 %			
residual ripple				
• maximum	100 mV			
voltage peak				
• maximum	200 mV			
display version for normal operation	Green LED for 24 V OK			

type of signal at output	via signaling module (6EP1961-3BA10)	
behavior of the output voltage when switching on	No overshoot of Vout (soft start)	
response delay maximum	2.5 s	
voltage increase time of the output voltage		
• maximum	500 ms	
output current		
rated value	20 A	
rated range	0 20 A; +60 +70 °C: Derating 2%/K	
supplied active power typical	480 W	
short-term overload current		
 at short-circuit during operation typical 	60 A	
duration of overloading capability for excess current		
 at short-circuit during operation 	25 ms	
constant overload current		
 on short-circuiting during the start-up typical 	23 A	
bridging of equipment	Yes; switchable characteristic	
number of parallel-switched equipment resources for increasing	2	
the power		
efficiency		
efficiency in percent	90 %	
power loss [W]		
at rated output voltage for rated value of the output	53 W	
current typical closed-loop control		
	1.0/.	
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	1 %	
relative control precision of the output voltage load step of	2 %	
resistive load 50/100/50 % typical		
setting time		
load step 50 to 100% typical	4 ms	
 load step 100 to 50% typical 	4 ms	
setting time		
maximum	10 ms	
	10 ms	
maximum	10 ms < 35 V	
maximum protection and monitoring		
maximum protection and monitoring design of the overvoltage protection	< 35 V	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	< 35 V Yes	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown"	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown"	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic resource protection class	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP	 < 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic resource protection class leakage current • maximum	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; UL-Listed (UL 508), File E197259; CSA (CSA C22.2 No. 14, CSA C22.2	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking • UL approval	Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; UL-Listed (UL 508), File E197259; CSA (CSA C22.2 No. 14, CSA C22.2 No. 107.1)	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical enduring short circuit current RMS value • typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; UL-Listed (UL 508), File E197259; CSA (CSA C22.2 No. 14, CSA C22.2 No. 107.1) Yes; UL-Listed (UL 508), File E197259, CSA (CSA C22.2 No. 14, CSA C22.2	
maximum protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection typical enduring short circuit current RMS value typical display version for overload and short circuit safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking UL approval CSA approval	< 35 V Yes Alternatively, constant current characteristic approx. 23 A or latching shutdown 23 A 23 A LED yellow for "overload", LED red for "latching shutdown" Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; UL-Listed (UL 508), File E197259; CSA (CSA C22.2 No. 14, CSA C22.2 No. 107.1) Yes; UL-Listed (UL 508), File E197259, CSA (CSA C22.2 No. 14, CSA C22.2 No. 107.1)

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly

no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
